SPRING

is just
around
the
corner!

It's true... Summer's barely passed . . . but if you want the beauty of Spring flowering bulbs, NOW'S THE TIME TO PLANT THEM. Use bulbs in flower beds, under trees, integrated into your foundation planting and your screening. Spring will burst forth in a riot of color . . . and if you let our horticultural experts aid in your selection, the flowering will continue well into the summer. Our bulb selection is complete — probably the largest you'll find anywhere, so VISIT THE NURSERY NOW!

LANDSCAPE SERVICE

Do-it-yourself is rewarding fun if you follow a sensible plan. We strongly suggest a visit to our landscape department. Our University trained specialists will discuss your needs . . . and if you desire, they will plan the complete landscaping of your property. Experience has proven that professional landscape planning is a money and work saver. You won't have to correct mistakes . . . and for budget purposes, the plan can be completed in stages.

NATURE'S WAY IS THE BEST WAY!

PLANT IN THE FALL!

Nobody can improve upon nature . . . look at any tree, shrub, flower or even your grass. During the Summer the seed is formed, and matures. In Fall it drops to the ground to start a new growth cycle.

Almost any tree, shrub, bush or plant also does best when transplanted in the Fall. Top growth is halted, so all energies are devoted to building sturdy new roots. In Spring, the plant bursts into vigorous new growth. Actually, by planting in Fall you receive a full year's extra growth!

Plant NOW... the selection at the nursery is beyond compare . . . and since leaves have not fallen, you can see the exact form of the tree you select. As an added plus, in a matter of weeks you'll be able to enjoy the beautiful Fall foliage of your selection.

EVERGREENS

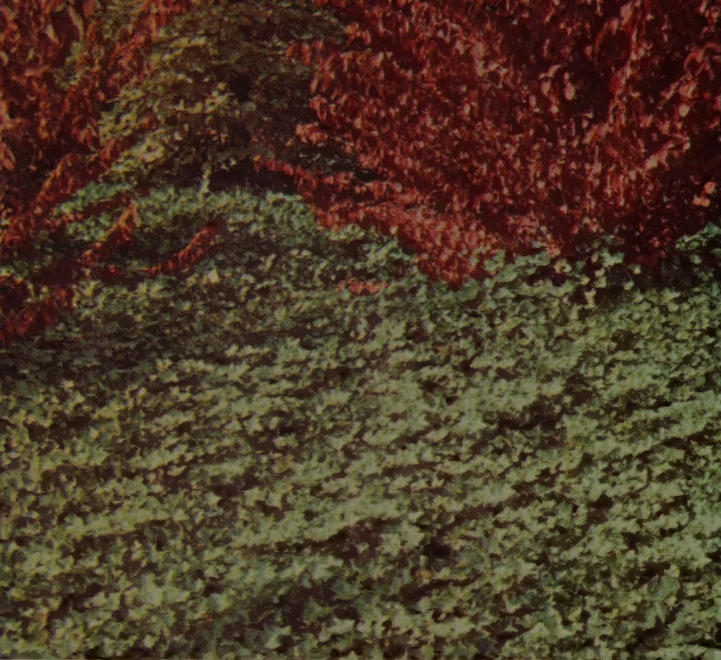

Growing conditions in our fields have been the best ever... our crop of evergreens for foundation planting, screening or as specimens is beyond compare. AT THE NURSERY you'll find any and every variety that is proven for this area. Thousands of trees and shrubs from the smaller budget sizes, to huge specimens await your selection. -NOW IS THE TIME TO PLANT. Evergreens in particular flourish best when given the full Fall period for new root growth. Planted now, your evergreens will have all of October, November, December and most of January to take hold. Don't forget . . . root growth continues until the ground is frozen solid to the bottom of the root ball. NOW'S THE TIME to plant a "friendly" evergreen screen for next year's outdoor living privacy... to upgrade your foundation plantings... or to put in specimen sizes to "perk-up" your property.

SHADE TREES

The most important, and usually most neglected single feature within any landscape is shade trees. As the backbone of any landscape plan . . . they provide background, beauty and comfort the year 'round. Shade trees increase in value rapidly . . . and they increase the livability of your property.

PLANT NOW and you'll get a full year's extra growth free. Next spring your tree will put forth new top growth immediately. Pick your tree now... when you truly see what you're choosing, rather than waiting until leaves fall. Our University trained landscape specialist will be pleased to discuss the correct variety, size and placement for your maximum enjoyment.

BALTIC IVY
Excellent as ground or wall cover. Smaller leaves than English Ivy. Very hardy, and it's evergreen.

AMERICAN ARBORVITAE
Easy to care for. Upright form shown makes a dense, narrow pyramid of dark green. Good as high, narrow screen. From **\$3.98**

MUGHO PINE
Low, mounded form. Upright stems give unusual effect. Light yellow or olive green foliage contrasts effectively with Yew or Holly in foundation plantings. From **\$5.98**

FRANKLIN TREE
Blooms end of August to freeze. Every specimen has descended from the one and only tree ever collected in the wild!

SPRING BEAUTY SCILLA
One of the lovely little bulbs to be planted now.

PRETTY PICTURES BECAUSE
...because, they were taken in the Fall. These pictures indicate how these plants will look on your property.
After a full Summer's growth, they are lush and hardy—just waiting to be transplanted, so that they can burst into vigorous new growth next Spring.
PLEASE...do some little plant a favor...PLANT IT NOW!

COTONEASTER
Leaves last well into winter. Large red berries in great profusion. An excellent highlight in many planting situations. From **\$2.98**

CANADIAN HEMLOCK
Best choice for hedge and screening. Impressive specimen. From **\$4.98**

JAPANESE HOLLY
Spreading (shown) or upright varieties. Small deep green leaves, black berries. Very dense habit. From **\$5.98**

DENSEFORM YEW
Spread about twice as wide as high. Dense to ground. Our favorite Yew variety for use as low hedge, or as specimen. From **\$3.98**

FIRETHORN
Rapid growing, irregular upright shrub. Often trained on chimneys or walls. Clusters of white flowers, and then red-orange berries in fall. From **\$2.98**

ANDROMEDA
Early spring produces lovely Lily-of-the-Valley type flowers. Shiny light green foliage. Use as specimen, or in mass. From **\$3.98**

PROFESSIONALLY PLANNED LANDSCAPING AT UNBELIEVABLE PRICES!
